

Wonderware Industry Application for Packaging

Delivering Industry-Specific Solutions Through Advanced Software and Modular Components

The Wonderware Industry Application for Packaging 1.0 enables producers to coordinate previously isolated packaging equipment and helps obtain consistent performance measurement and execution of packaging operations. The Industry Application for Packaging meets the differing needs of Operations, Engineering, Quality and Production Planning personnel in packaging operations. Through powerful capabilities, key business challenges including stringent quality and regulatory requirements, diverse business factors, and isolated packaging equipment are addressed.

Based on Wonderware System Platform, InTouch HMI and Wonderware Performance Software, the Industry Application for Packaging out-of-the-box capabilities help producers meet critical business objectives such as faster delivery and changeover times, decreased product losses, less downtime, greater flexibility and higher throughput and efficiencies.

Key Benefits

- Integrate and manage existing packaging machines and systems
 - Flexible, open scalable software architecture integrates with most packaging systems
- Gain visibility into packaging losses, variation and problems
- Reduce manual data collection and line operator interactions
- Plan and monitor packaging operations in one intuitive environment
- Lower implementation risk and total cost of ownership with world-class Wonderware technical support and services

Software Solutions for Real-Time SuccessSM

Wonderware Industry Application for Packaging

Key Features

- Basic State Model of Packaging Equipment
 - OMAC Ready
- Downtime and Utilization Monitoring
- Order Management
 - Create, Sequence and Dispatch Orders
- Overall Equipment Effectiveness (OEE)

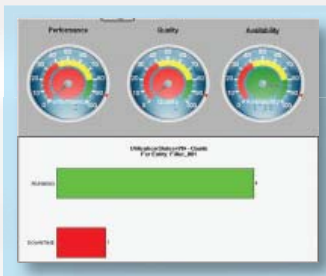

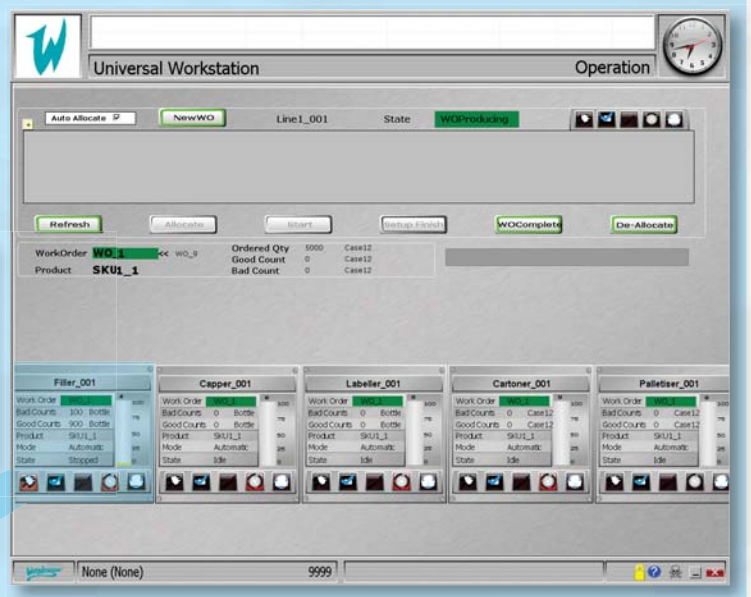

Packaging Area Summary

- View Overall Line Conditions
- See Real-time Line Statuses
- Line Performance At-a-Glance

Line Summary

- Create/Dispatch Jobs to a Line
- Manage Setup for Each Job Run
- Monitor Current Status of Each Piece of Equipment

Equipment Detail

- View Performance, OEE and Utilization of Machine
- View and Set the Current Machine State (Run, Hold, Stop, etc.)
- Manage Machine Setup
